

Insurance Guideline

Your initial consultation will typically be covered by your insurance. However, many insurance companies do not cover the cost of the actual procedure, as they are currently considered experimental. The overall cost for treatment will ultimately depend on the type of treatment recommended and whether one or multiple treatment rounds are necessary. We offer competitive pricing* for various regenerative treatments:

- Stem Cell Injection for one joint: \$3,500.
- Stem Cell Injection for two joints: \$5,000

*Prices are subject to change. Your price will be finalized during your initial consultation.

Am I a Candidate?

For long-term pain relief and healing without surgery, call us at **602-277-6211** and find out if you are a candidate for stem cell therapy.
