

Welcoming...

Dr. Justin Roberts, M.D.

Lower Extremity Specialist,
General Orthopedic Trauma

Dr. Justin Roberts is an orthopedic surgeon who is fellowship trained in surgery of the foot and ankle. He specializes in comprehensive care of the lower extremities, including knee and leg pain. He has special interests in ankle and knee replacement, sports injuries, flat foot correction, bunion correction, arthroscopy, and lower extremity post-traumatic reconstruction.

Dr. Roberts was born and raised in Bakersfield, California. He received his undergraduate degree with highest honors at the University of California, Santa Barbara, then attended medical school at the University of California, San Diego. Dr. Roberts came to Phoenix for orthopedic residency at Banner University Medical Center, then completed fellowship training at the Orthopedic Associates of Michigan in Grand Rapids. During fellowship, he received comprehensive training in complex surgical reconstruction of the foot and ankle, knee replacement, and general orthopedic trauma.

Dr. Roberts promotes a relaxed atmosphere where open and honest communication is encouraged. Patient education is a critical part of his practice, and he will take the time to explain your condition and treatment options. He emphasizes non-operative measures prior to recommending surgery whenever possible. Dr. Roberts understands that orthopedic problems can be very disabling and recovery can be extensive. He also recognizes that optimal function requires precise interaction between all of the joints of the lower extremity. He is dedicated to finding the root of the problem and working to get you back to the quality of life you desire.
